Rating	Remark
100-80	Excellent
79-60	Good
59-40	Marginal
39-0	Poor

- PPM : Calculated by dividing the sum of defects by quantity received multiplied by 1000000. The points are given as per the table shown.
- On Time Delivery : Divide delivered quantity by scheduled quantity for the month to get % OTD for the month, and multiply by 40 to get delivery score.
- The average score is the average of total score for 6 months.
- NS : No Supply.
- 5 points will be deducted from QR rating, in case of customer disruptions (shipment stoppage, yard holds) due to incoming quality in the particular month.
- 5 points will be deducted from DR rating, in case of premium freight in the particular month.
